-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Art Rejections:**

1. The text of 35 USC 103(a) not cite here can be found in the previous office action.

2. Claims 1-10 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Birdwell et al, U.S. pat. No. 5,793,973.

Birdwell discloses a system and method for providing data delivery confirmation to the server comprising:

a) an ID issuance part for generating a message ID that is uniquely related to a message (see col 6, lines 34-36),

b) a data creation/transmission part for creating and transmitting a message including message content and additional data (e.g. message header) including the message ID, server information and client information (col 5, lines 7-14),

c) a delivery confirmation transmission part at the client for creating and transmitting a delivery confirmation message, that includes the message ID and client ID, to the server (col 6, lines 36-45),

d) a delivery confirmation receiving part at the server for receiving and processing the delivery confirmation message transmitted from the client (see col 6, lines 46-49).

Birdwell does not explicitly disclose means generating a packet header, i.e. plug-in data part, containing source and

destination addresses. An official notice is taken that such packet header is conventionally generated by the data transmission means.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize such packet header generation in Birdwell because it would have enabled the server transmit the packets to the clients via a communication network (see col 6, lines 12-38).

Per claims 3-4, Birdwell also teaches that messages transmitted between the server and client be encrypted for providing secured transmission over the communication channel (see col 5, lines 19-28).

**Response to Amendment:**

3. Applicant's arguments with respect to claims 1-10 filed 2/2/04 are moot in view of new ground of rejection set forth above.

**Conclusion:**

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is (703) 305-9597. The examiner can normally be reached on Monday through Thursday from 8:00am to 4:00pm.
